

ABSTRACT OF THE DISCLOSURE

5 An acupuncture needle container and dispenser to store and
dispense a plurality of sterile acupuncture needles having a
transparent top cover piece and an opaque colored bottom piece
with a distal end, a proximal end and a middle portion. The
transparent top cover piece fits over the opaque colored bottom
piece and forms a semi-oval needle reservoir at the distal end, a
cylindrical inserter at the proximal end and a channel formed
10 between the semi-oval needle reservoir and the cylindrical
inserter to allow for an individual channeled movement of the
plurality of acupuncture needles from the semi-oval needle
reservoir through the formed channel and into the cylindrical
inserter.
